SUBJECT INDEX TO VOLUME 4

A

Alcohol,
dietary, effect on hepatic choline uptake in rats, 165
feeding, and choline deficiency, effects in rats, 383
Alfalfa meal, as a source of pro-Vitamin A for turkey poults, 197
Alga spirulina, utilization as a protein source in rats, 31
Altitude exposure, effect on energy requirements of man, 77
Amino acid,
diets, imbalanced, effect of pituitary extract on food intake in rats, 207
requirements, of growing rabbits, 59
Anabolic steroids,
effect on nitrogen balance and ribonuclease levels in man, 151
_____ strength performance of athletes, 363
and exercise, effect on body and organ weights of rats, 65
Antithiamine activity, of tea, effect of temperature and pH in vitro, 223
Aquatic blend, as a source of pro-Vitamin A for turkey poult, 197
D-Araboascorbic acid, vitamin C activity in guinea pigs, 177
Atherosclerosis, editorial: atherosclerosis-progress and patience, 117

B

Behavior, of prenatally undernourished rats, 307
Bone, effect of 25-hydroxycholecalciferol in Vitamin D-deficient rats, 119
Brain,
development, and perinatal malnutrition, 237-320
mitochondria function, effect of maternal protein malnutrition on progeny, 279

C

Calorie restriction, maternal, effect on nutritional state and DNA of progeny, 269
Caprylic acid, utilization by young and old rats, 95
β-Carotene, conversion to Vitamin A in turkeys, 191
Chickpea flour, supplementary value to poor wheat diets, effect on PER of rats, 229
Chicks, growing, comparative interaction and desposition of ω3 and ω6 fatty acids in brain, 19
Choline,
deficiency, and alcohol feeding, effects in rats, 383
hepatic uptake, effect of dietary alcohol and fat in rats, 165
Corn diets, supplementary value of pigeonpea flour in rats, 229
Corticosteroids, effect on nitrogen balance and ribonuclease levels in man, 151

D

Density of diet, effect on food and water intake in rats, 49
DNA
(cell number), alteration in neonatal brain by maternal calorie restriction, 269
polymerase activity, as an index of cell division rate in rat and human placenta, 239

E

Energy,
requirements, of man after abrupt altitude exposure, 77
utilization in rats, effect of caprylic acid, 95
Enzyme activity, in immature rats, effect of food deprivation and re-feeding, 275

F

Fat, dietary, effect on hepatic choline uptake in rats, 165
Fatty acid,
composition, of liver mitochondria and microsomes in fed and fasted rats, 351
in chick brain, comparative interaction and deposition, 19
__ rat testis, on normal and Vitamin E-deficient diets, 103
Folate, and nicotinate and riboflavin deficiencies in rats, 185
Folcysteine, influence in protein metabolism of rats, 83
Food intake,
of intact and hypophysectomized rats, effects of pituitary extract, 207
and water in rats, effect of dietary density, 49
Fructose tolerance tests, effect of contraceptive steroids in rats, 341

G

Galactose tolerance tests, effect of contraceptive steroids in rats, 341
Glucose tolerance tests, effect of contraceptive steroids in rats, 341
Goiter, incidence in Indians of Peruvian Highlands, 127
Growth, effect of maternal dietary restriction on progeny, 237-320
Guinea pigs, antiscorbutic activity of D-araboascrobic acid, 177

H

Heart rate, effect of altitude exposure in man, 77
Hemopoiesis, in old age in humans, effect of supplimentary Vitamin C and iron, 371
25-Hydroxycholecalciferol, effect on bone of Vitamin D-deficient rats, 119

I

Iodine nutrition, a study of Peruvian Indians 12-20 years of age, 127
Iron,
absorption, effect of methionine supplementation in rats, 217
and Vitamin C, effect of supplementation in old age in humans, 371
Isoascorbic acid, Vitamin C activity in guinea pigs, 177
Isocitrate dehydrogenase, effect of choline deficiency and alcohol feeding in rats, 383

L

Linoleic acid, metabolism in Vitamin E-deficient rat testis, 103
Lipids, dietary, and protein, effect on α-tocopherol requirement in rats, 9

M

Malnutrition,
in developing countries, prevention by cereal supplementation, 315
perinatal, and brain development, 237-320
Manganese, effect of choline deficiency and alcohol feeding in rats, 383
Menhaden oil, effect on ω fatty acids in chick brain, 19
Mestranol, effect on oral sugar tolerance tests in rats, 341
Methandrostenolone,
effect on body and organ weights in rats, 65
_____ strength performance of weightlifters, 363
Methionine,
supplementation, minor effect on iron absorption in rats, 217
_____, of yeast grown on petroleum hydrocarbon , effect on PER of rats, 171
Mexico, nutrition and development in infants, 139
Mice, fasted and non-fasted, influence of tryptophan on hepatic polyribosomes and protein synthesis, 1
Microwave heating, effect on nutritive value of soybean meals, 378
Milk, consumption by breast-fed Mexican infants, effect on nutrition and development, 139

N

Nandrolone, effect on body and organ weights in rats, 65
Nicotinate, and folate and riboflavin deficiencies in rats, 185
Nitrogen retention, in rats, effect of caprylic acid, 95
Norethynodrel, effect on oral sugar tolerance tests in rats, 341
Nutrition, and development in Mexican infants, milk consumption, 139
Nutritional status, effect of maternal dietary restriction on progeny, 237-320

O

Oxygen uptake, effect of altitude exposure in man, 77

P

Peru, a study on iodine nutrition in man, 127
Petroleum yeast protein, effect of methionine supplementation on PER of rats, 171
Physical exercise, and anabolic steroids, effect on body and organ weights in rats, 65
Pigeonpea flour, supplementary value to poor corn diets, effect on PER of rats, 229
Pituitary extract, effect on food intake of rats fed imbalanced amino acid diets, 207
Polyribosomes, hepatic, and protein synthesis, influence of tryptophan in mice, 1
Protein,
  dietary, and lipid source, effect on α-tocopherol requirement in rats, 9
  food, low-cost, supplementary value to poor rice and ragi diets in rats, 109
  metabolism, of rats, effect of -SH group releasing substances, 83
  nutrition, in man, significance of blood ribonuclease levels, 151
  source, utilization of alga spirulina in rats, 31
  synthesis and hepatic polyribosomes, influence of tryptophan in mice, 1
  _____ at the synaptic ending, 291
  value, improvement of yeast by methionine supplementation in rats, 171
Provitamin A (see Vitamin A)
Pulmonary ventilation, effect of altitude exposure in man, 77

R

Rabbits,
  growing, amino acid requirements, 59
  Vitamin E deficient, distribution of α-tocopherol between erythrocytes and plasma, 325
  _____, relative turnover rates of tocochromanols, 45
Rats,
  albino, effects of chickpea and pigeonpea supplements on PER, 229
  _____, _____ on growth rate of low-cost protein food, 109
  _____, _____ of 25-hydroxycholecalciferol on bone of Vitamin D-deficient animals, 119
  choline deficient, effect of alcohol on cardiac isocitrate dehydrogenase and manganese, 383
  hypophysectomized and intact, effect of pituitary extract on food intake, 207
  mature, effect of exercise and anabolic steroids on body and organ weights, 65

Rats, (continued)
pair-fed, hepatic choline uptake under the influence of dietary alcohol and fat, 165
selenium deficient, histrochemical and histopathological effects following selenium supplementation, 335
various ages, influence of -SH group releasing substances on protein metabolism, 83
vitamin-deficient, effect on tetrahydrofolates in liver, 185
_____ E- deficient, metabolism of linoleic acid, 103
weanling, effect of alga spirulina on PER and NPU, 31
_____, _____ dietary protein level and lipid source on α-tocoperhol requirement, 9
_____, _____ minor methionine supplementation on iron absorbption, 217
_____, _____ on PER by supplementary yeast with methionine, 171
young, effect of contraceptive steroids on oral sugar tolerance tests, 341
_____, _____ dietary density on food and water intake, 49
_____, _____ fasting on fatty acid composition of liver, 341
_____, and old, utilization of caprylic acid, 95
Riboflavin, and folate and nicotinate deficiencies in rats, 185
Ribonuclease,
activity, in rat and human placenta, as an index of growth rate or nutritional studies, 239
blood levels in man, protein metabolic significance, 151
Ribose tolerance tests, effect of contraceptive steroids in rats, 341
Rice, and ragi diets, effect of wheat and soybean blend in rats, 109

S

Safflower oil, effect on ω fatty acids in chick brain, 19
Selenium, nutritional requirement in rats, 335
Soybean,
and wheat blend supplementary value to poor rice and ragi diets in rats, 109
meal, effect on nutritive value by microwave heating, 378
Stanozolol, effect on body and organ weights in rats, 65
Steroids, contraceptive, effect on oral sugar tolerance tests in rats, 341
Sulphydryl groups, influence on protein metabolism of rats, 83

T

Tea, antithiamine effects in vitro, 223
Tetrahydrofolates, effect on biosynthesis by vitamin deficiences in rats, 185
Thiouracil, and dietary restriction, effect on progeny, 245
Tocochromanols, in rabbit plasma, relative turnover rates, 45

α-tocopherol,
distribution in Vitamin E depleted rabbits, 325
requirement, in rats, effect of dietary protein level and lipid source, 9
Tryptophan, influence on hepatic polyribosomes and protein synthesis in mice, 1
Turkeys,
alfalfa meal and aquatic blend as a source of pro-Vitamin A, 197
conversion of β-carotene to Vitamin A in blood and liver, 191

V

Vitamin,
A, alfalfa meal and aquatic blend as a source of pro-A for turkeys, 197
__, and conversion of β-carotene in turkeys, 191
C, activity, of D-araboascorbic acid in guinea pigs, 177
__, and iron, effect of supplementation on hemopoiesis in old age in humans, 371
D, deficiency, effect of 25-hydroxycholecalciferol in rats, 119
E, deficiency in rat testis, metabolism of linoleic acid, 103
__, depletion in rabbits, effect on α-tocopherol distribution, 325
__, and selenium requirements of rats, 335
deficiencies, interactions and effect in rats, 185

W

Water, and food intake, in rats, effect of dietary density, 49
Wheat,
diets, supplementary value of chickpea flour in rats, 229
and soybean blend, supplementary value to poor rice and ragi diets in rats, 109

Y

Yeast, grown on petroleum hydrocarbon, effect of methionine supplementation on PER of rats, 171
